Carson City, NV 89701

RE: Modification to Application for a Permit to Construct and Operate a Class 1 Landfill Facility  
Jungo Disposal Site, Humboldt County, Nevada

Dear Mr. Taylor:

On behalf of Jungo Land & Investments, Inc., this letter is a supplemental response to your letter dated March 4, 2009 (First Technical Review of Jungo Landfill Application) and Golder Associates response dated May 29, 2009 (Response to Technical Review Comments).

In response to subsequent discussions regarding the above referenced correspondence, and increased public concern regarding groundwater at the location of proposed landfill, we have revised the design of the base liner system to consist of a double liner system with primary and secondary leachate collection.

The relevant sections of the application package have been revised and are as follows:

- Report of Design (Revision 3, Revised April 2010)
- Appendix D: Monitoring Plan (Revision 1, Revised April 2010)
- Drawing 1 – Drawing Index
- Drawing 3A – Base Grading Plan
- Drawing 4 – Liner and LCRS Details
- Drawing 8 – Final Cover Details

An original and one copy of the above are enclosed with this cover letter. An electronic copy is also included.

As you are aware, we have a meeting scheduled for April 29, 2010 to discuss the revised design and will include the addition of a separate assessment document.

Thank you for your time and attention to this project. If you have any questions or require additional information, please contact me at (415) 875-1245 or by email at [emerrill@recology.com](mailto:emerrill@recology.com).

Sincerely,

Erin Merrill  
Project Manager
